Description

Viper Serum Face Cream is an anti-aging treatment that prevents and reduces wrinkles. Thanks to its active ingredient "Sin Ake" known precisely as Viper Serum, it is the basic ingredient of avant-garde anti-wrinkle face treatment formulas, a synthetic tripeptide that reproduces in an attenuated and localized way the effect caused by a viper bite, reduces muscle contractions of facial expressions and gives the skin a tensor, revitalizing, moisturizing and regenerating effect. Designed for mature skin, but still suitable for all ages. In fact, younger skins will find beneficial in the moisturizing and protective effect. How to use: Apply morning and evening on the face and neck with a light massage from the bottom up, avoiding the eye area.
